1	**About Us**	About Us	**BUILT, UPDATE LIVE**	`/about`	`about.html`	/about/	95% of the wording is the same. 16 words here are not on the live page, and 35 words on the live page are not here.	
2	**AC Installation**	Cooling	**BUILT, UPDATE LIVE**	`/ac-installation`	`ac-installation.html`	/air-conditioner/installation/	96% of the wording is the same. 53 words here are not on the live page, and 59 words on the live page are not here.	"Free Estimate" appears in the page title, the hero line and the closing paragraph. It is the brief's own wording, left as written. Many contractor markets restrict that phrase, so confirm it before launch.
3	**AC Maintenance**	Cooling	**BUILT, UPDATE LIVE**	`/ac-maintenance`	`ac-maintenance.html`	/air-conditioner/maintenance/	90% of the wording is the same. 109 words here are not on the live page, and 156 words on the live page are not here.

Mirror of the live ad landing page, kept byte for byte. Its menu button, Book Now and BBB badge are under 44px on a phone and the review attributions are 10px. Those come from the live theme, not from this build, and cannot be reached from our stylesheet.
5	**AC Repair**	Cooling	**BUILT, UPDATE LIVE**	`/ac-repair`	`ac-repair.html`	/air-conditioner/repair/	92% of the wording is the same. 90 words here are not on the live page, and 139 words on the live page are not here.

18	**Blog Template (for dev to duplicate)**		**TEMPLATE**	`/blog-template`	`blog-template.html`	Not live yet		THE BLOG TEMPLATE, a different thing from the blog index. Not a page, and it must not be published. It is the file to duplicate to build post 14 onward: rename the copy blog-<url slug>.html, work down its 32 SWAP notes for what changes per post, leave the 3 KEEP notes alone, then add a card for it on the blog index. Nothing links to it.
19	**Utah Inversion HVAC Checklist**	Blog index	**BUILT, NEW**	`/blog-utah-inversion-hvac-checklist`	`blog-utah-inversion-hvac-checklist.html`	Not live yet		
20	**Water Heater Leaking From Bottom**	Blog index	**BUILT, NEW**	`/blog-water-heater-leaking-from-bottom`	`blog-water-heater-leaking-from-bottom.html`	Not live yet

22	**Blog**	About Us	**BUILT, UPDATE LIVE**	`/blog`	`blog.html`	/blog/	36% of the wording is the same. 588 words here are not on the live page, and 50 words on the live page are not here.	THE BLOG INDEX. The one page that lists the articles. It carries a card for each one linking through, and no article wording of its own. All 13 articles in this package are on it. Publish a fourteenth and add its card here too. Separately: no publish dates and no author byline exist anywhere in this set. The content calendar lists all 13 as Scheduled to Post with no date, and no brief names an author. One card carries the spelling "recognise", which is the brief's own wording.
23	**Camera Inspection**	Sewer and Drains	**BUILT, UPDATE LIVE**	`/camera-inspection`	`camera-inspection.html`	/plumber/camera-inspection/	99% of the wording is the same. 7 words here are not on the live page, and 15 words on the live page are not here.	
24	**Coming Soon (placeholder)**		**PLACEHOLDER**	`/coming-soon`	`coming-soon.html`	Not live yet		Placeholder destination. Every nav or body link whose page is not built yet points here rather than nowhere.

#	Page	Menu	Status	Link on the preview	HTML file that holds it	Live page today	How it differs from the live page	Note
25	**Contact Us**	Contact Us	**BUILT, UPDATE LIVE**	`/contact`	`contact.html`	/contact/	96% of the wording is the same. 7 words here are not on the live page, and 26 words on the live page are not here.	The form is the live site's own Gravity Forms markup, kept so dev has the real field names and IDs. Gravity Forms is WordPress software, so it cannot run on a static host and the form does not send from the preview. A short script stands in for it, which keeps the page free of errors and labels the form instead of letting it look like it sends. Delete that script when the plugin is in place.
26	**Cottonwood Heights, UT Air Conditioning**	Service Area	**BUILT, UPDATE LIVE**	`/cottonwood-heights-ut-air-conditioning`	`cottonwood-heights-ut-air-conditioning.html`	/cottonwood-heights-ut/air-conditioning/	99% of the wording is the same. 7 words here are not on the live page, and 15 words on the live page are not here.

Mirror of the live ad landing page, kept byte for byte. Its menu button, Book Now and BBB badge are under 44px on a phone and the review attributions are 10px. Those come from the live theme, not from this build, and cannot be reached from our stylesheet.
44	**Furnace Repair**	Heating	**BUILT, UPDATE LIVE**	`/furnace-repair`	`furnace-repair.html`	/heating/furnace-repair/	96% of the wording is the same. 58 words here are not on the live page, and 63 words on the live page are not here.	Carrier, Lennox, Rheem and Goodman show as logos. Trane and American Standard stay as names because the only marks available are the parent company (Trane Technologies) and the plumbing fixtures business, both of which would be the wrong logo. Bryant and York had no usable file. More important: a manufacturer logo normally signals authorized dealer status, and the copy only claims that Sunny services these brands.
45	**Furnace Replacement Experts**		**BUILT, UPDATE LIVE**	`/furnace-replacement-experts`	`furnace-replacement-experts.html`	/furnace-replacement-experts/	98% of the wording is the same. 30 words here are not on the live page, and 23 words on the live page are not here. The section headed "Heating Systems and Brands We Service" lists only system types (gas furnaces, electric furnaces, heat pumps, mini-splits) and names no brand at all. Either drop "and Brands" from the heading or carry the furnace page's brand list here.
50	**Herriman, UT Air Conditioning**	Service Area	**BUILT, UPDATE LIVE**	`/herriman-ut-air-conditioning`	`herriman-ut-air-conditioning.html`	/herriman-ut/air-conditioning/	99% of the wording is the same. 7 words here are not on the live page, and 15 words on the live page are not here.

54	**Hydro Jetting**	Sewer and Drains	**BUILT, UPDATE LIVE**	`/hydro-jetting`	`hydro-jetting.html`	/plumber/hydro-jetting/	99% of the wording is the same. 8 words here are not on the live page, and 24 words on the live page are not here.	
55	**Home**	Home (logo)	**BUILT, UPDATE LIVE**	`/`	`home-page.html`	/	96% of the wording is the same. 60 words here are not on the live page, and 86 words on the live page are not here.	
56	**Air Quality**	Air Quality	**BUILT, UPDATE LIVE**	`/indoor-air-quality`	`indoor-air-quality.html`	/indoor-air-quality/	96% of the wording is the same. 44 words here are not on the live page, and 58 words on the live page are not here.	
57	**Kearns, UT**	Service Area	**BUILT, NEW**	`/kearns-ut`	`kearns-ut.html`	Not live yet		Its brief says "50+ years of combined HVAC and plumbing experience" while every Millcreek and service page brief says "over 30 years". Both are left as each brief wrote them. The three Kearns child pages (AC, heating, plumbers) have no copy yet, so those links point at Coming Soon.
58	**Leak Detection**	Plumbing	**BUILT, UPDATE LIVE**	`/leak-detection`	`leak-detection.html`	/plumber/leak-detection/	99% of the wording is the same. 7 words here are not on the live page, and 15 words on the live page are not here.

Built and styled, but the policy wording is a placeholder. The live site serves this text from a consent platform rather than the page, so it could not be pulled and nothing was invented.
